Helen -- Another answer (question) to follow up on Melissa's question is whether we are firm on the location. Again focusing on Heather and Jim, if Heather can travel to Spokane or Jim can travel to Olympia, that could be a key consideration. DanO.

Hi Melissa

We were hoping to have a face to face, though some participants will be calling in. We may be able to arrange for video conferencing.

Subject: Pend Oreille TMDL meeting with the Kalispel Tribe and EPA

EPA is trying to schedule a meeting with Ecology and the Kalispel Tribe to discuss the Pend Oreille River Temperature TMDL. At this point the only date before June that the Tribe and EPA are available is April 30th from 12 to 2 pm. Could you let us know if you would be available

for that time by the end of this week? We would like to schedule this meeting as early as possible.
